Diamond Square 3D Surface Plot

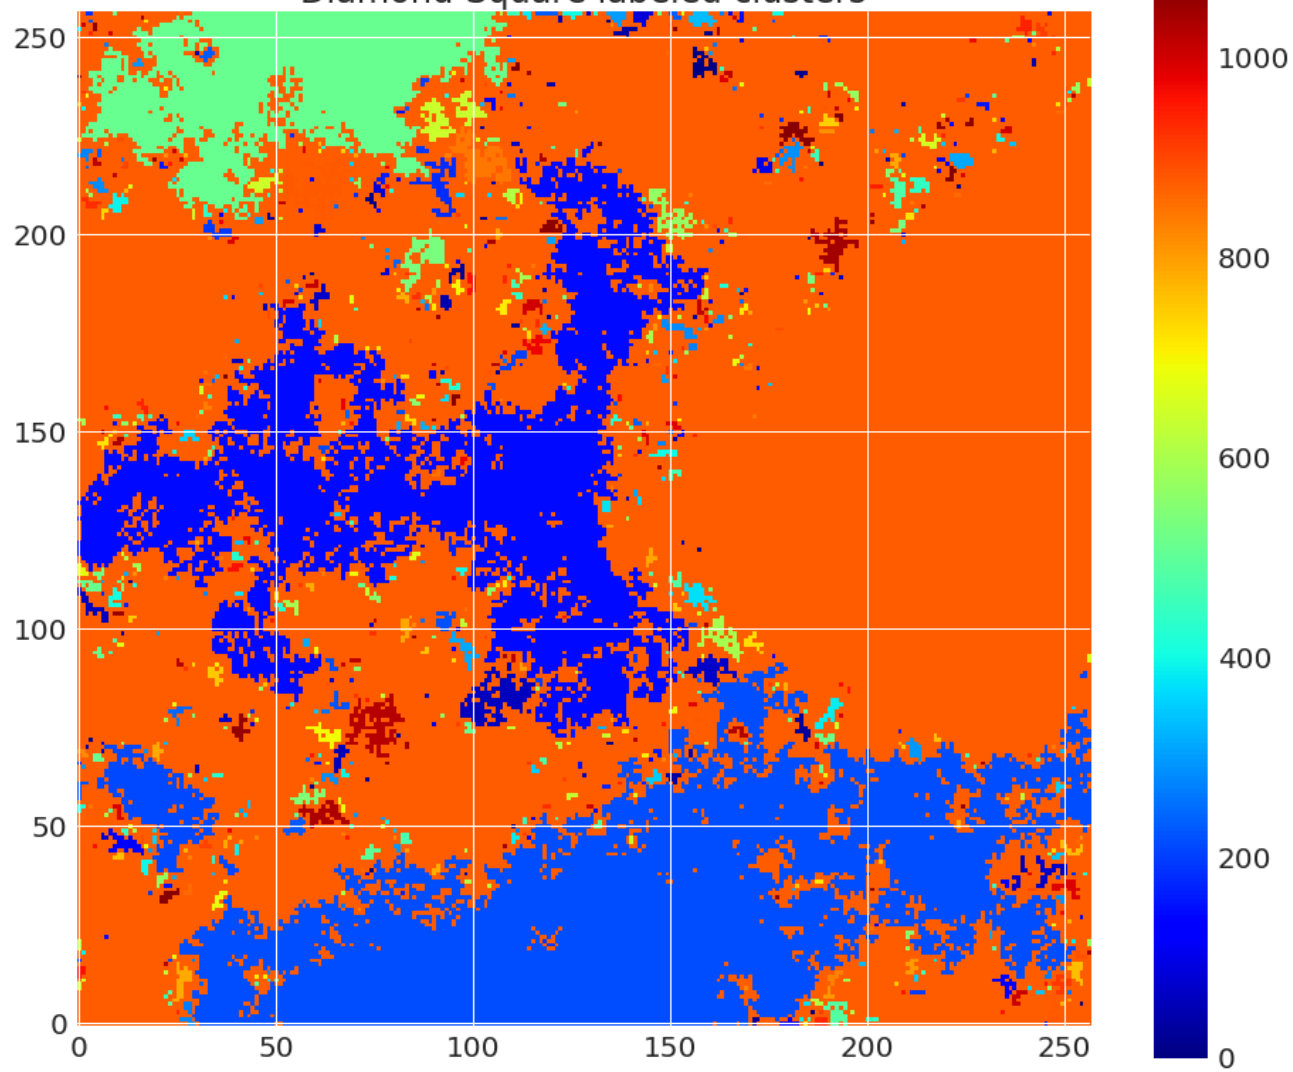

Diamond-Square < p=0.45, L=257

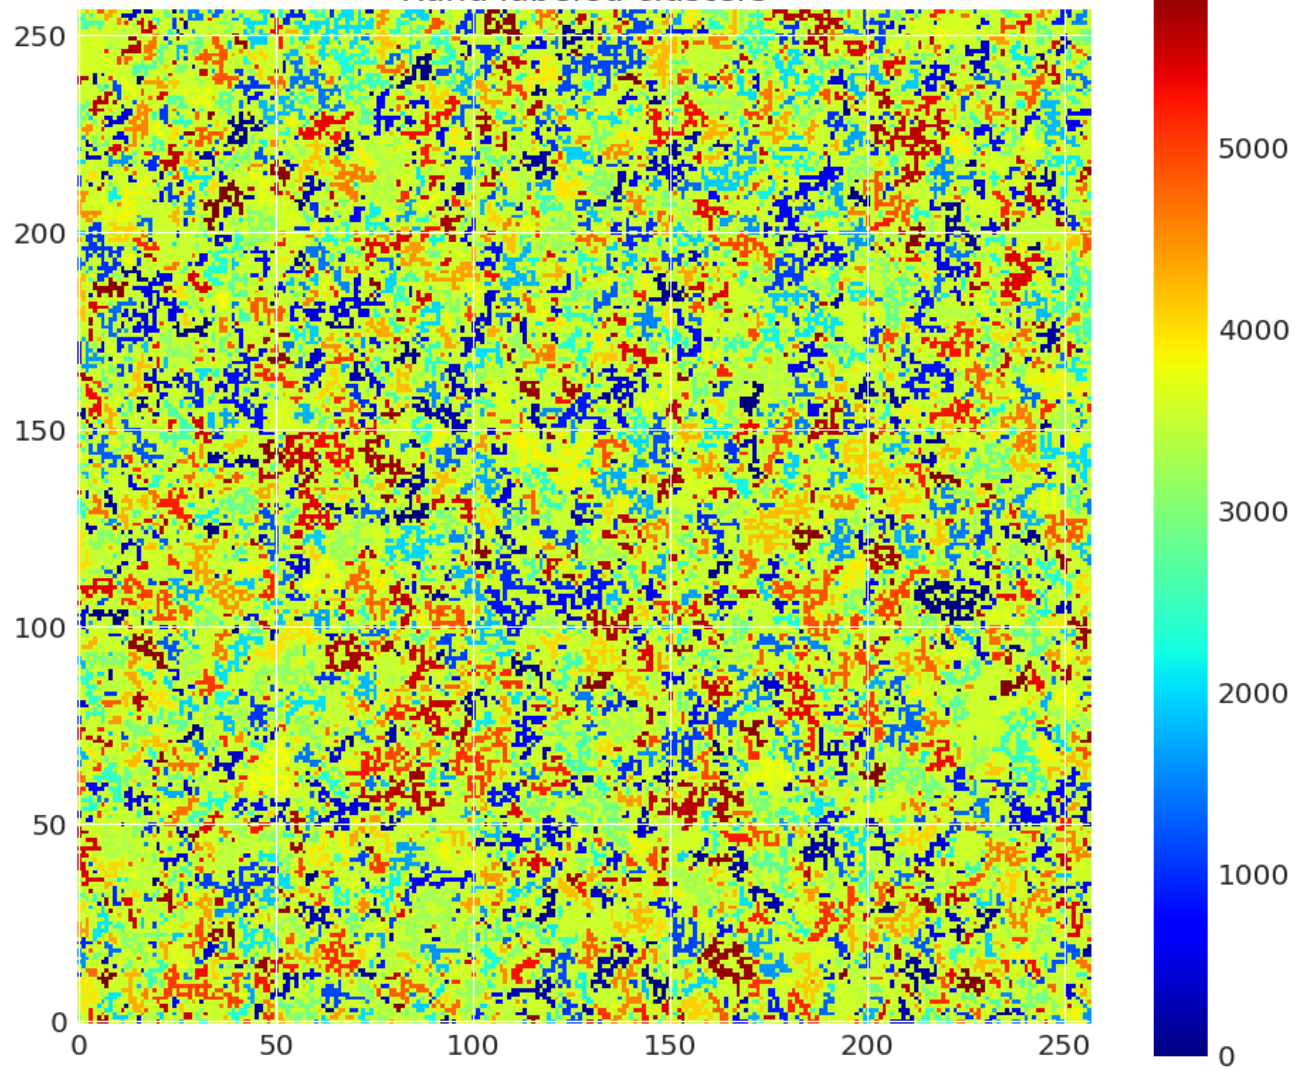

Rand < p=0.45, L=257

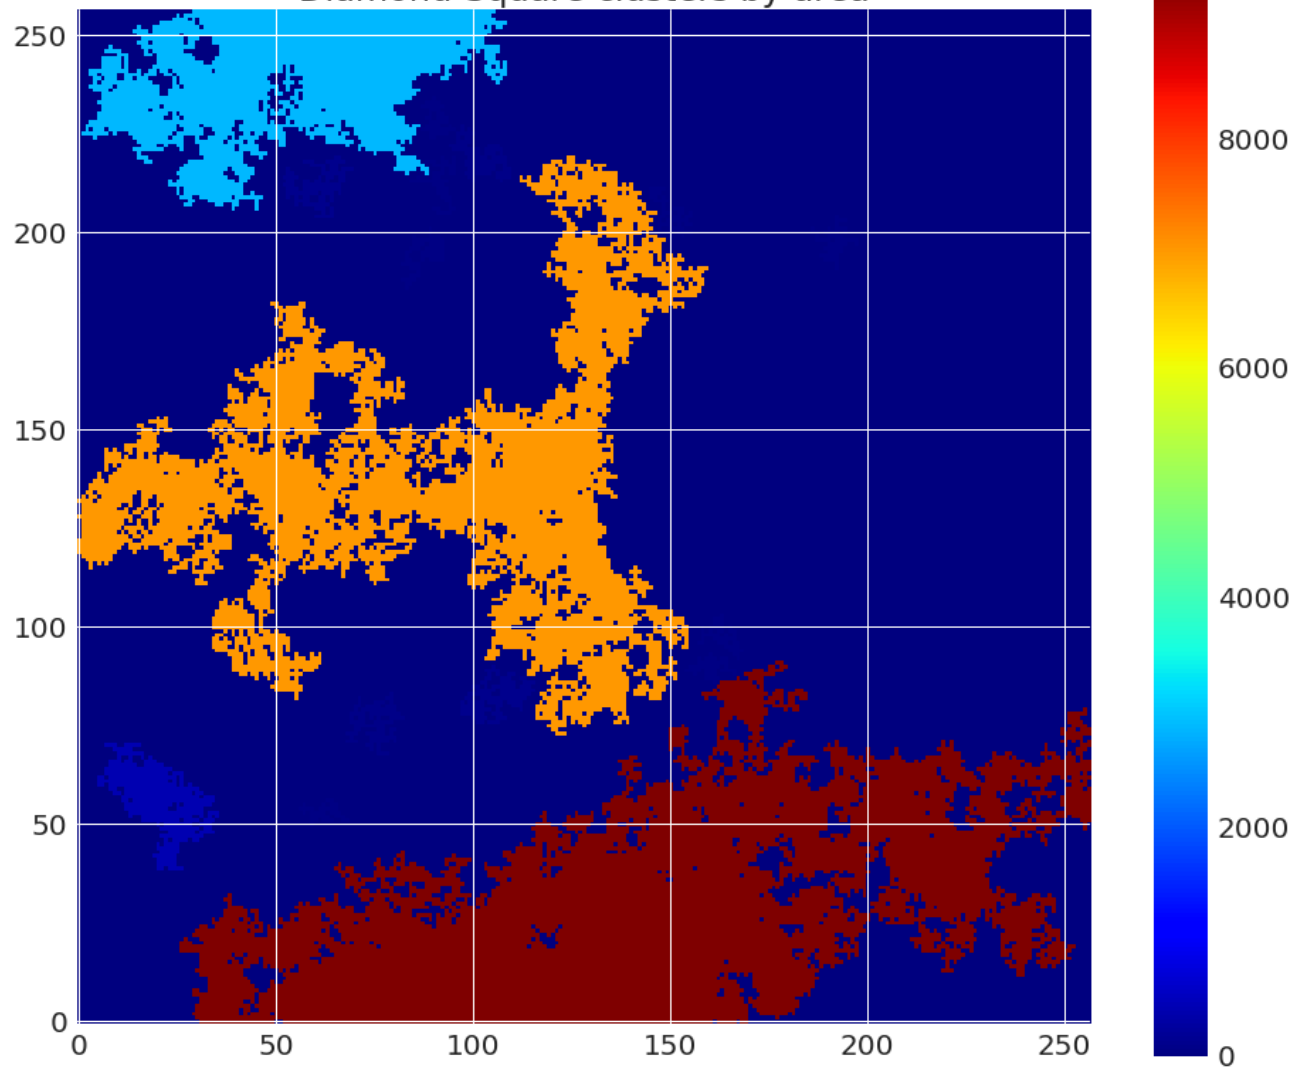

Diamond-Square labeled clusters

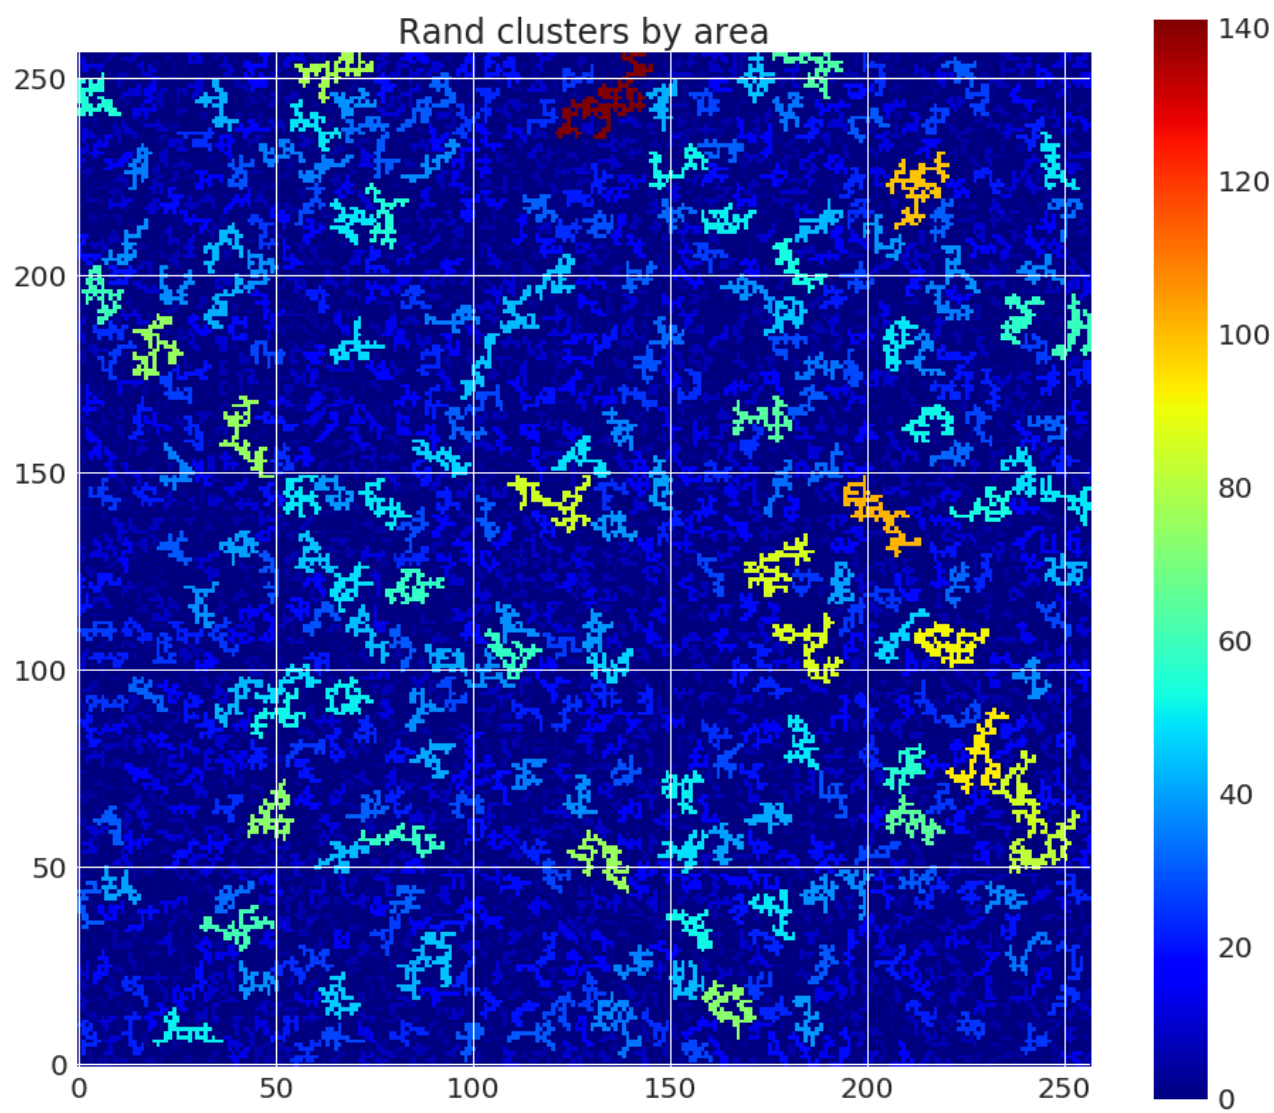

Rand labeled clusters

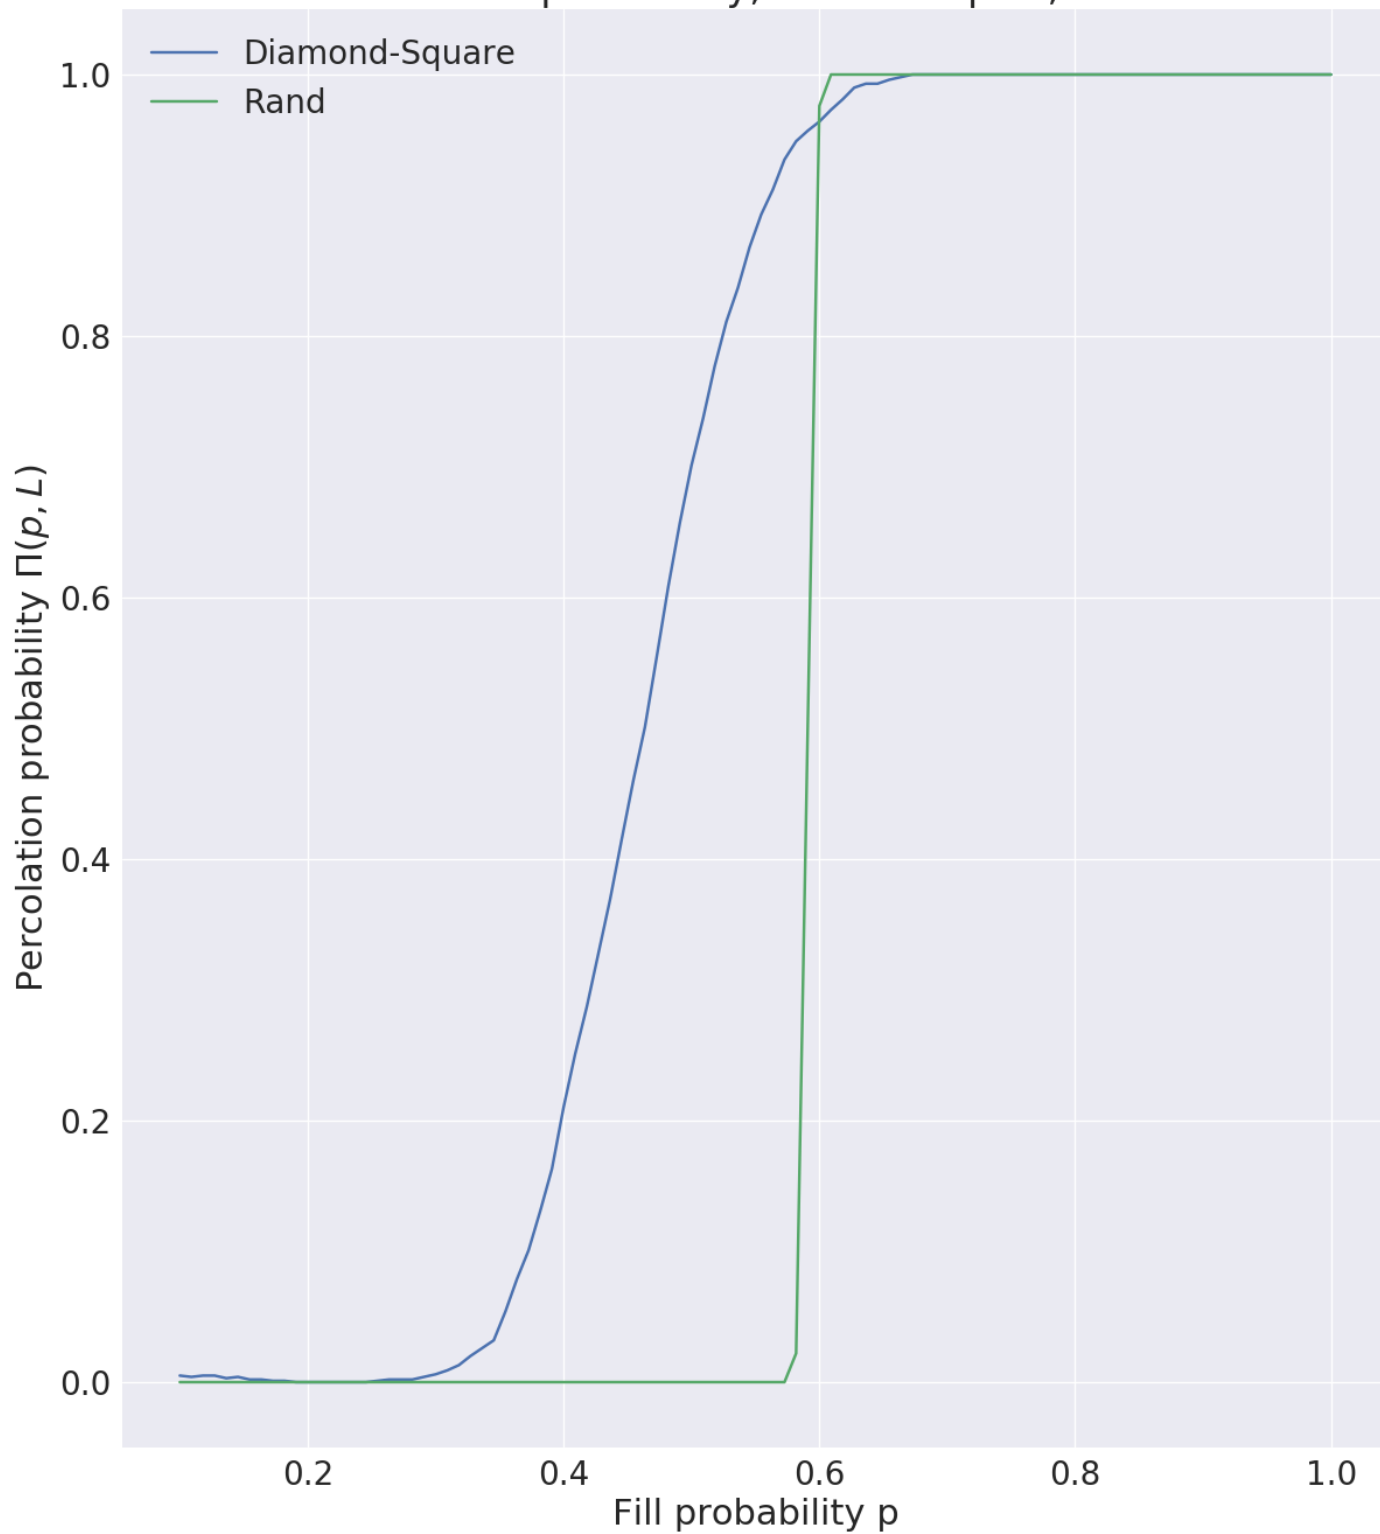

Diamond-Square clusters by area

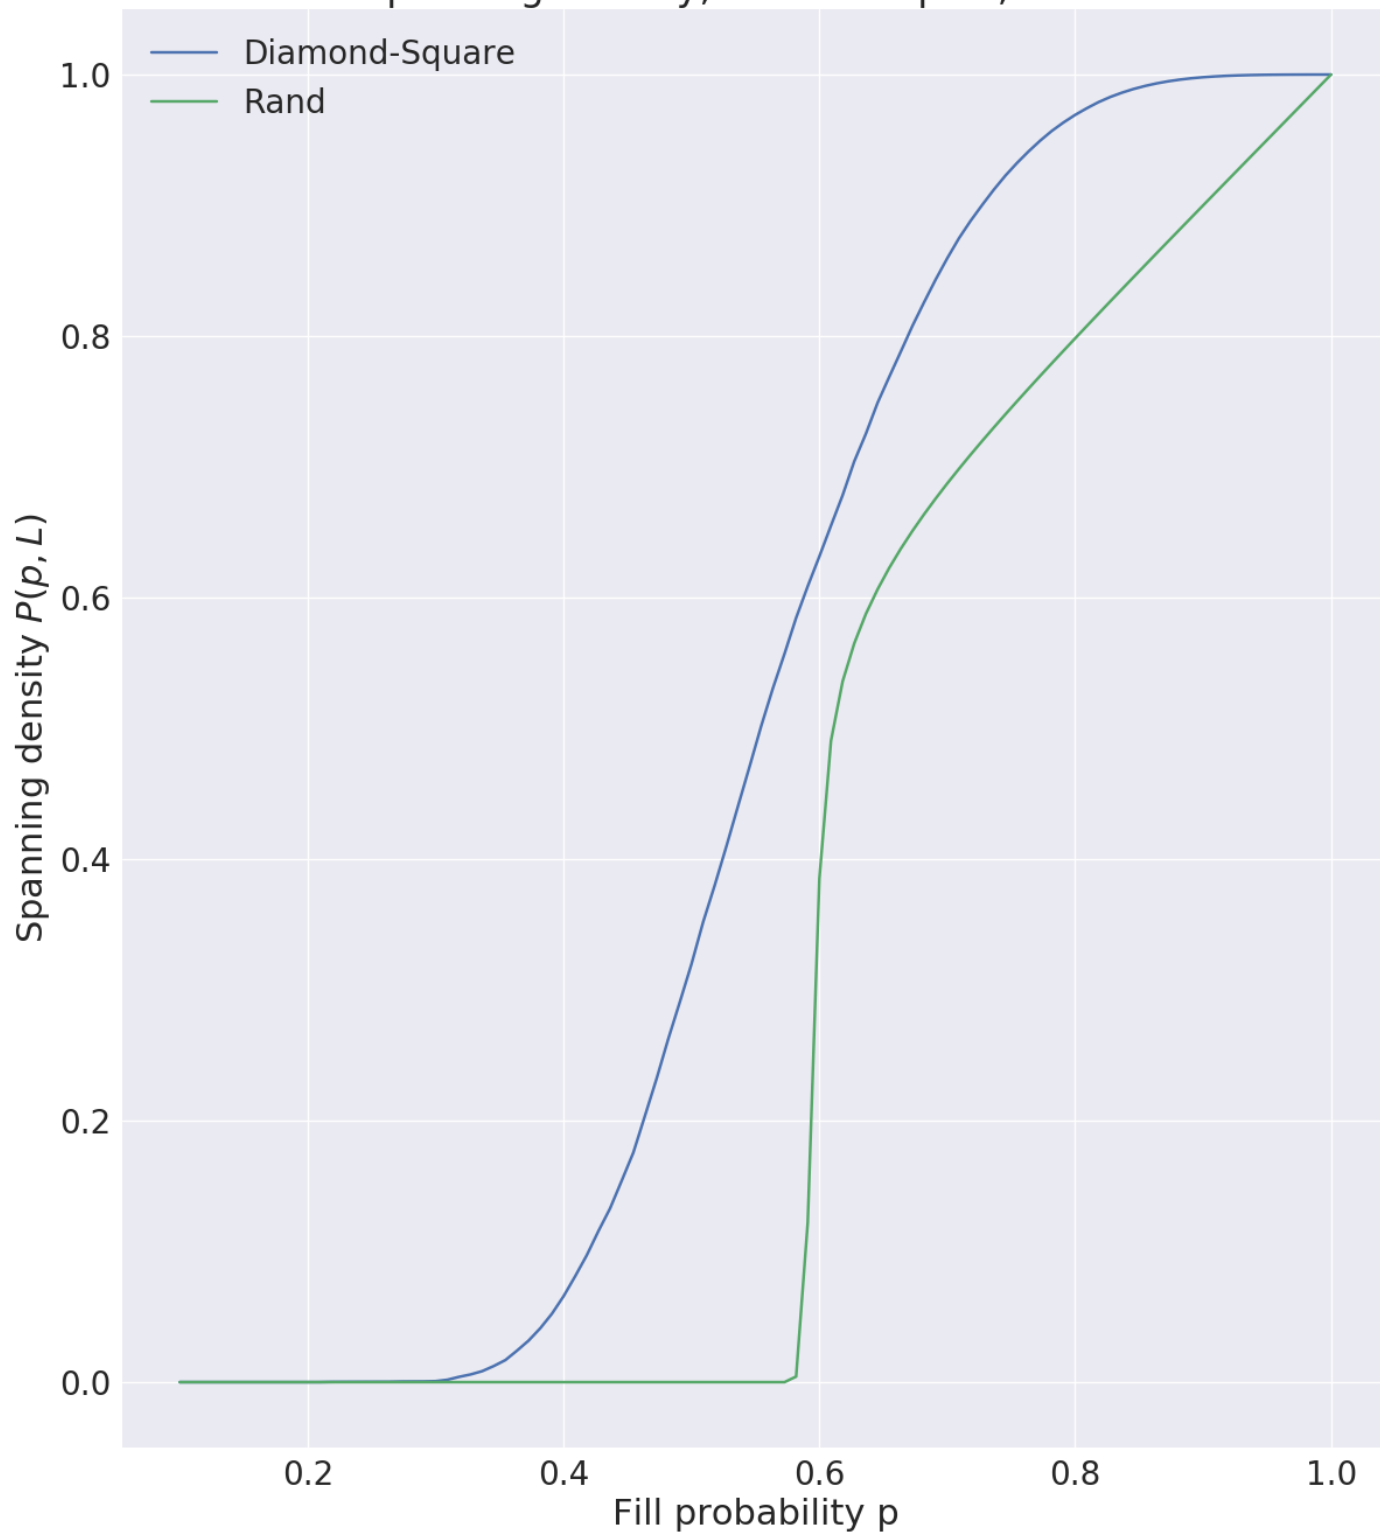

Rand clusters by area

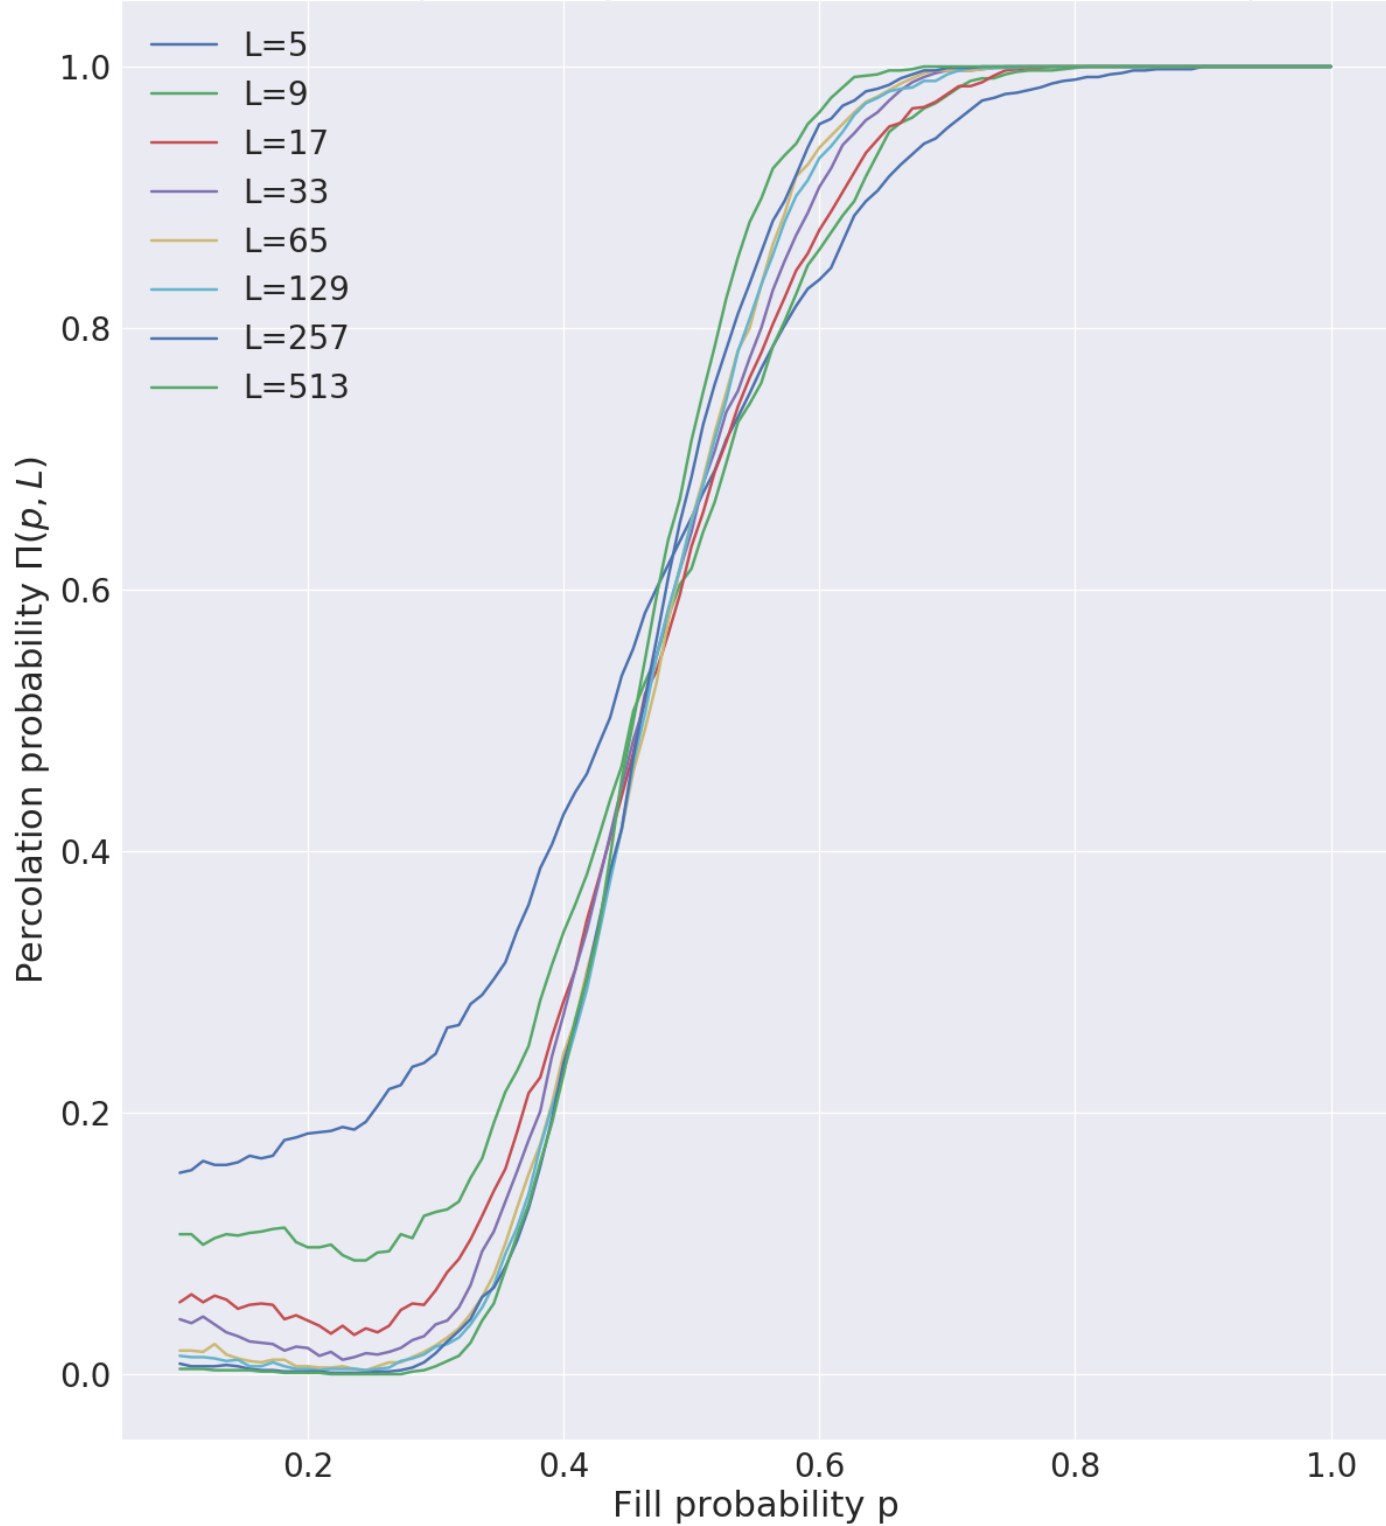

Percolation probability, 1000 samples, L=513

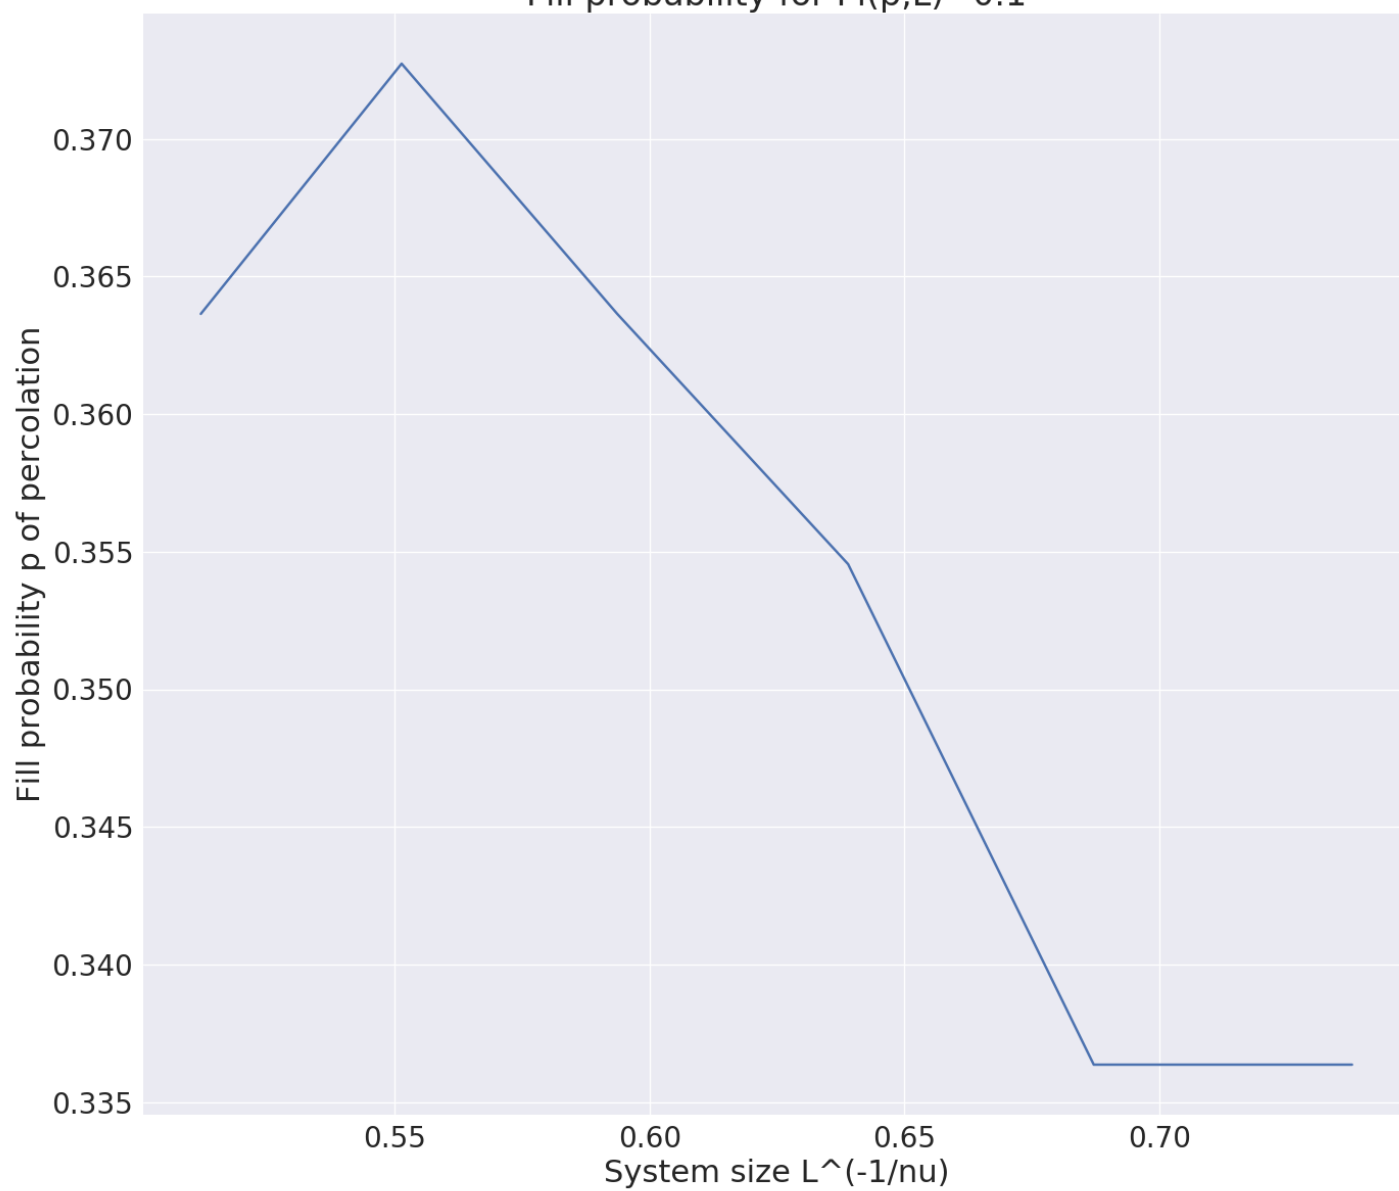

Spanning density, 1000 samples, L=513

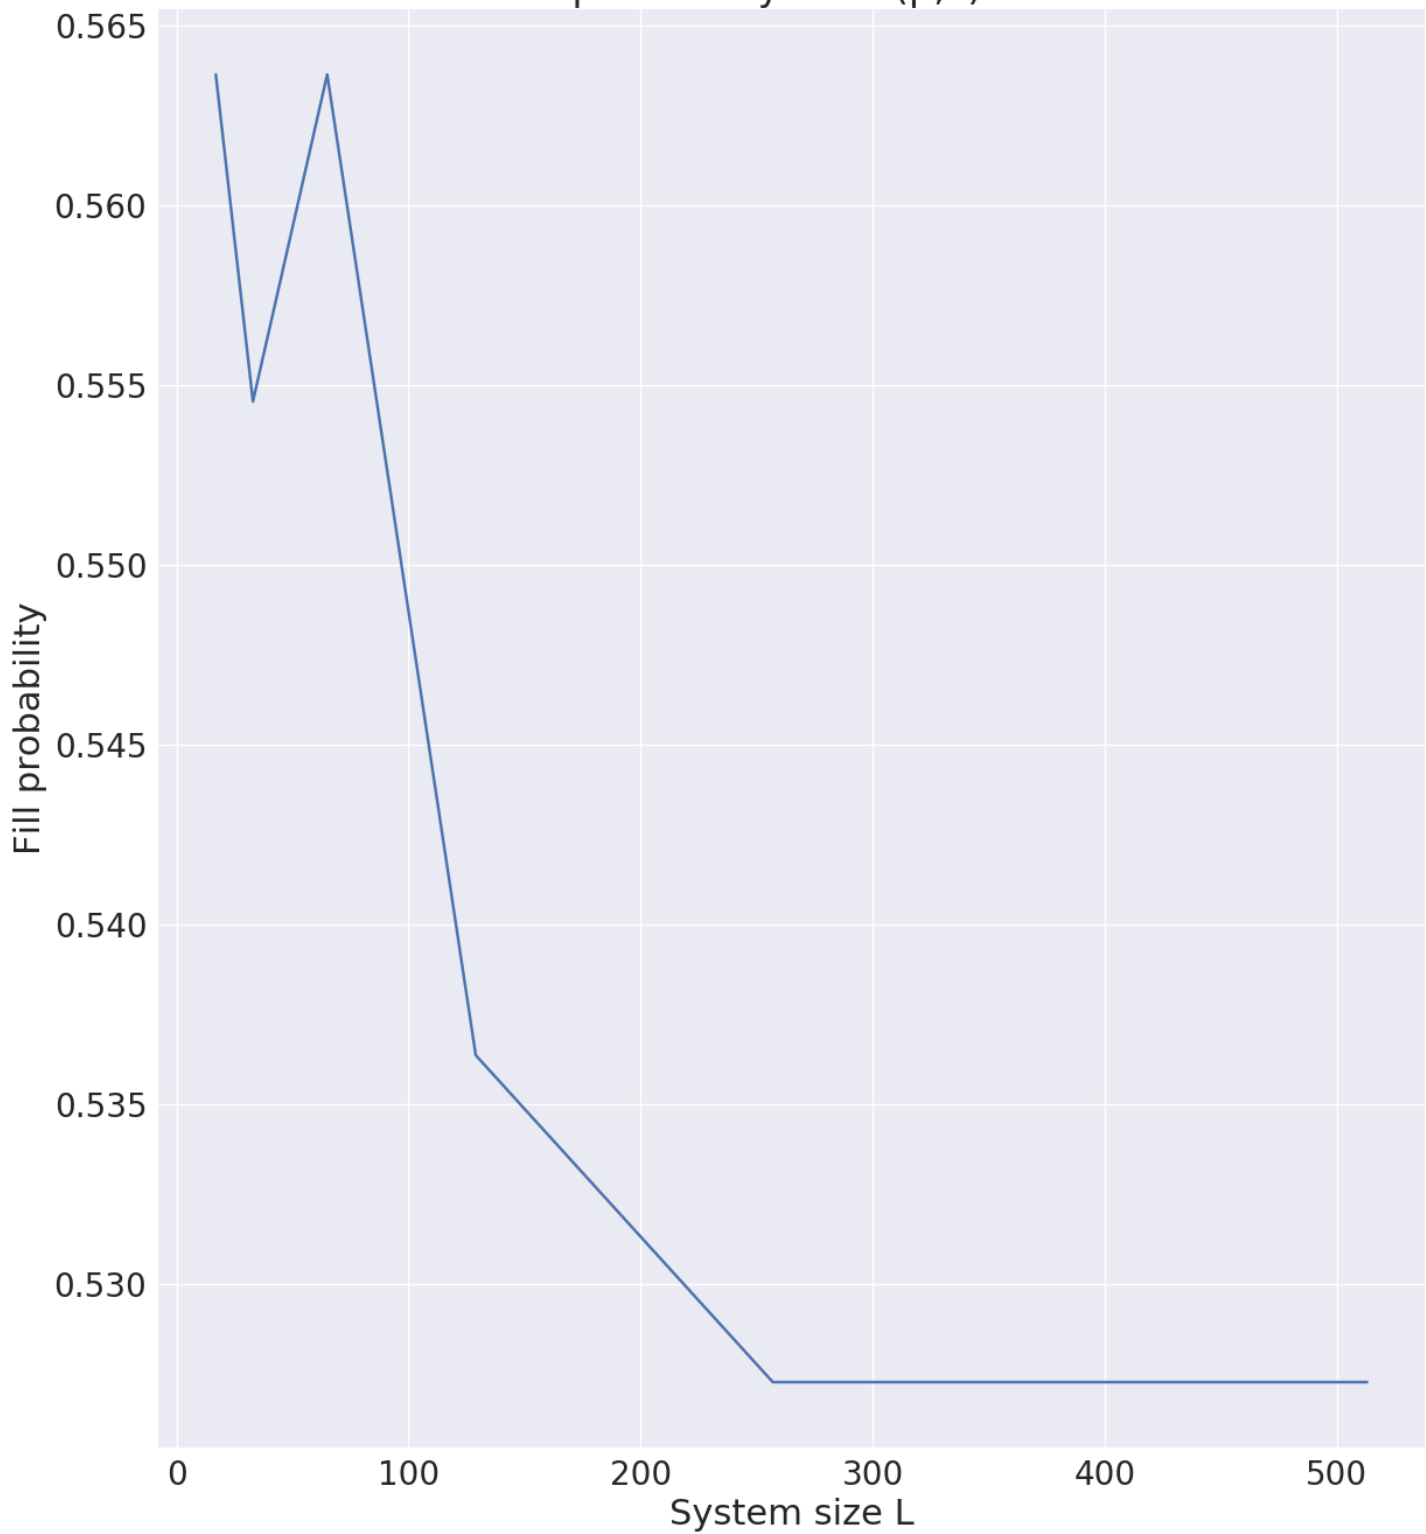

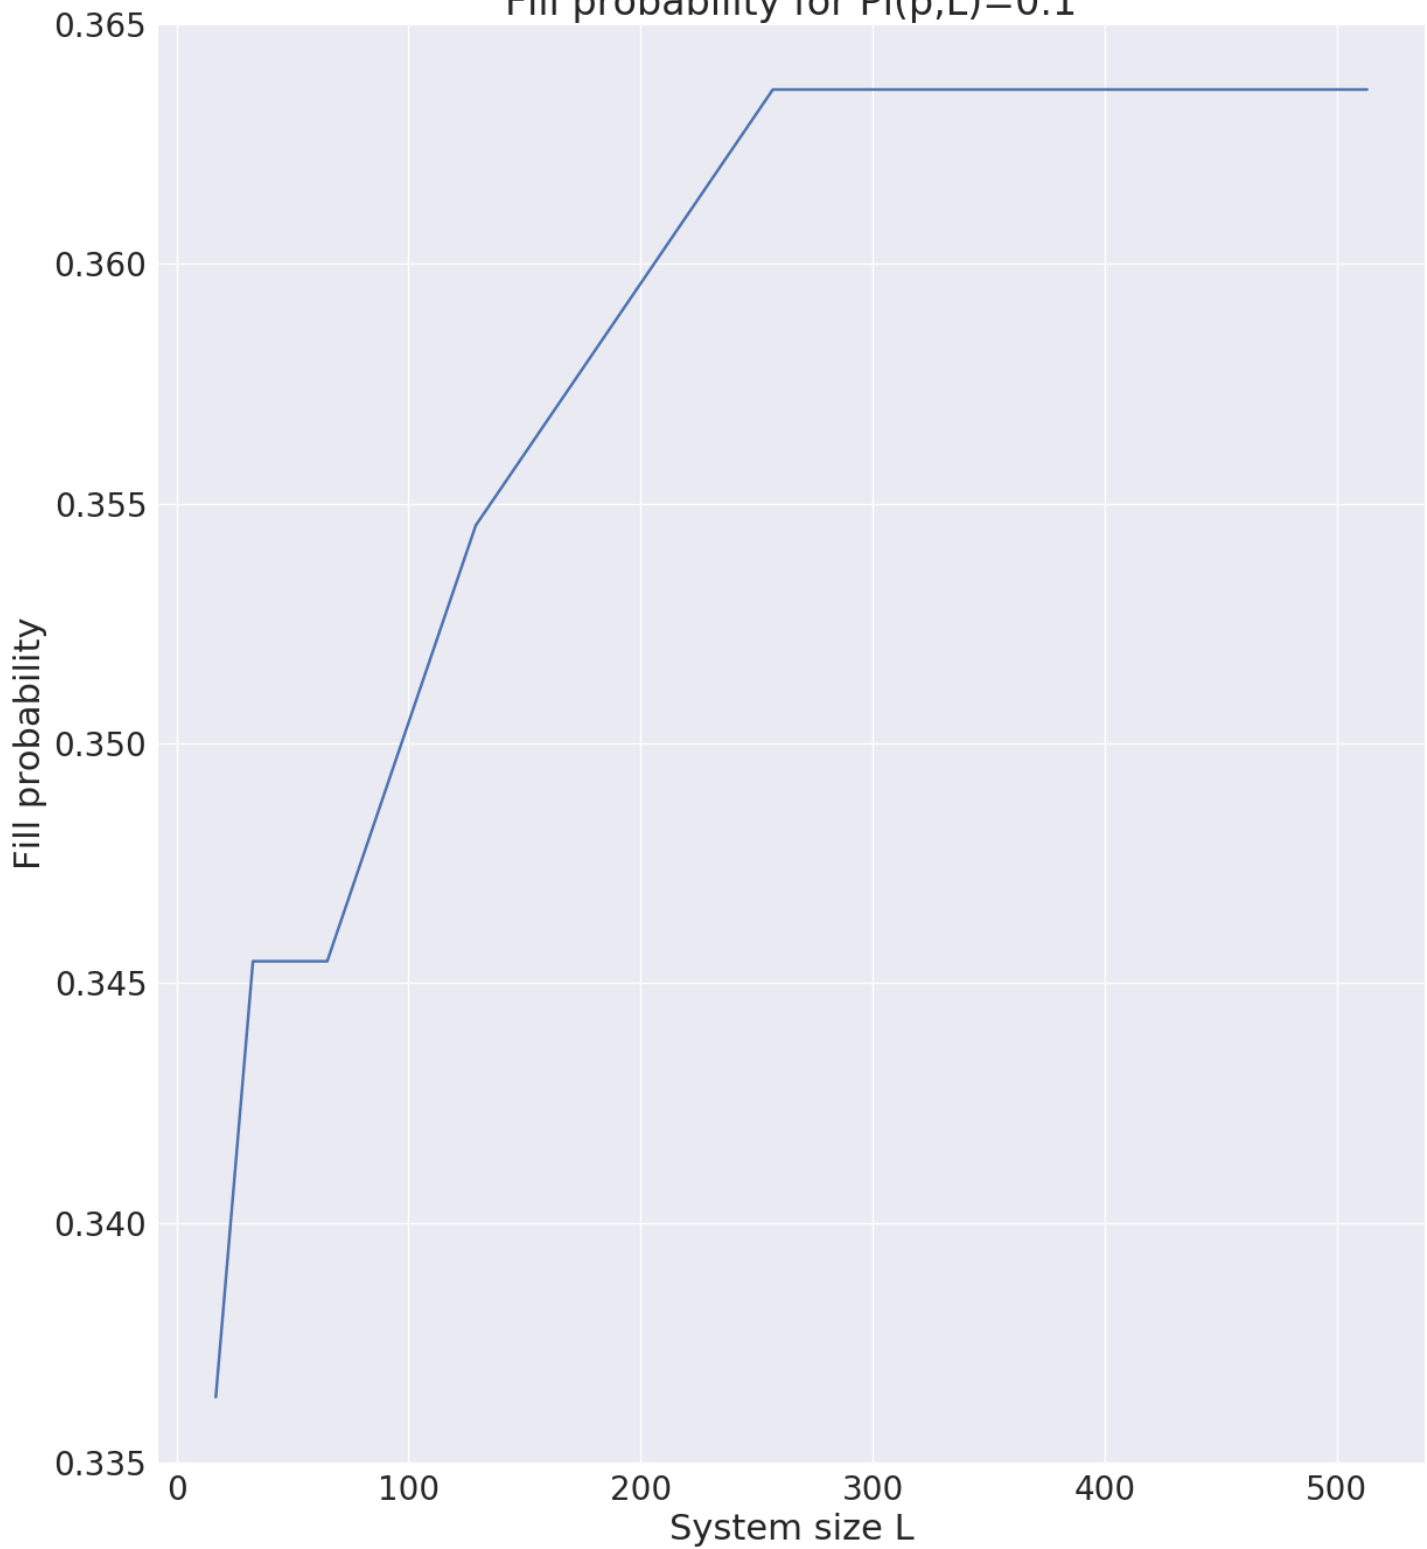

Fill probability for $\Pi(p,L)=0.1$

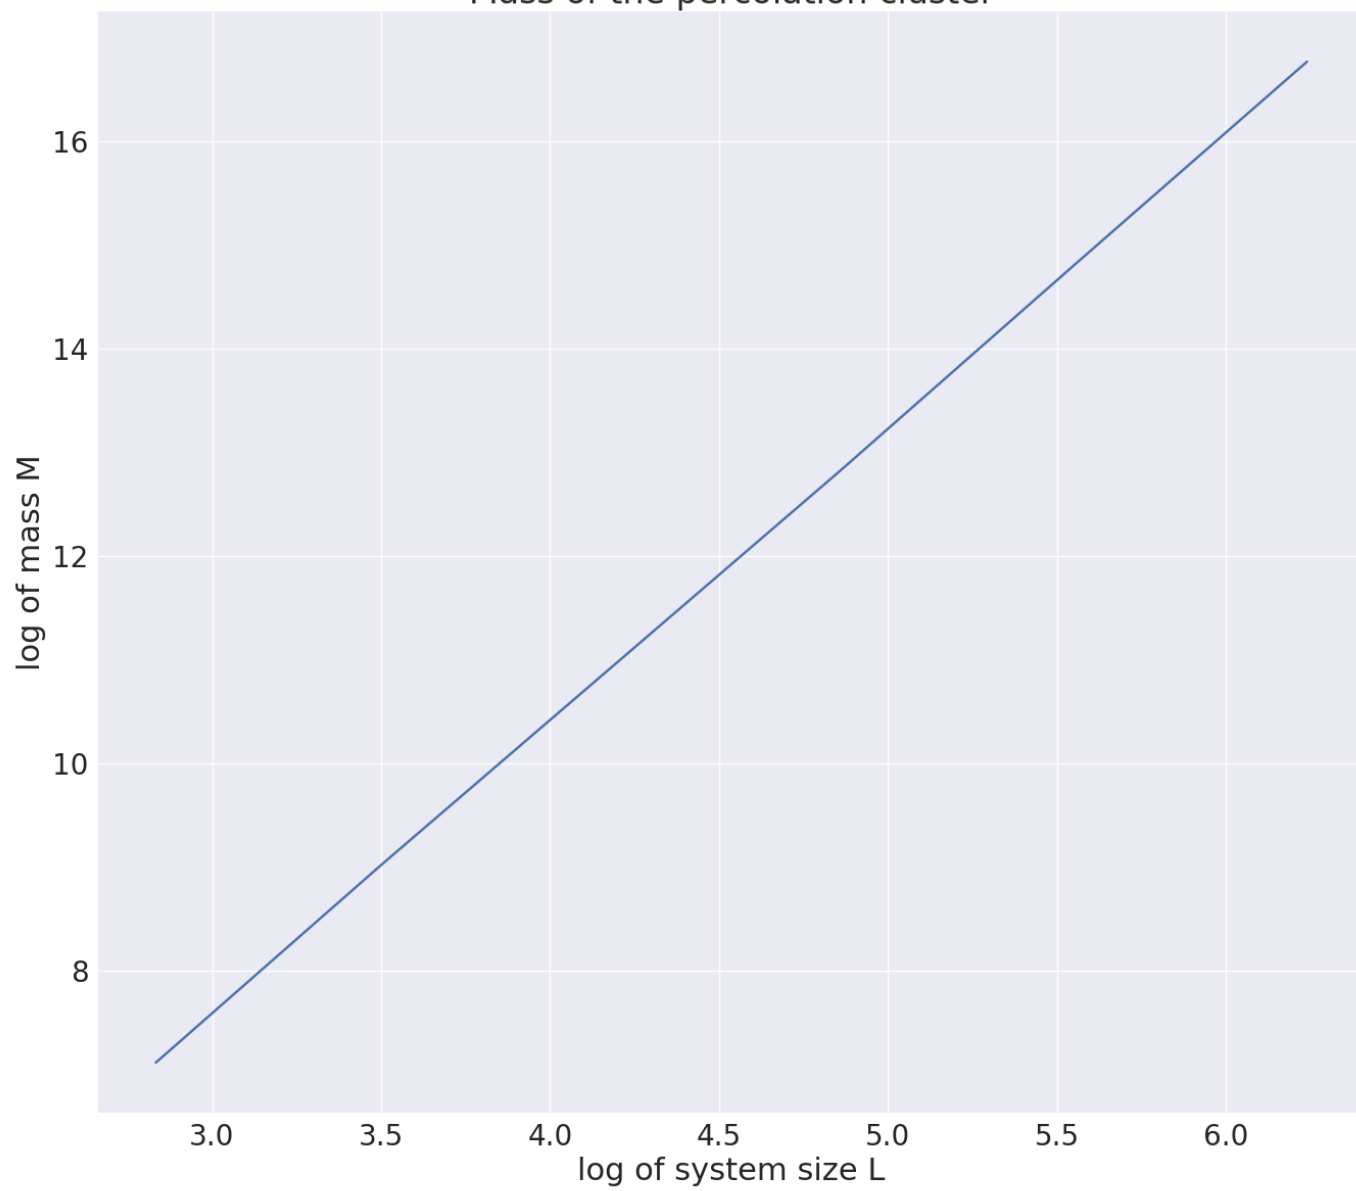

Fill probability for $P_i(p,L)=0.8$

Fill probability for $P_i(p,L)=0.1$

Mass of the percolation cluster

correlation function $g(r,p,L)$, $L=65$
